

Computer Controlled Automated Pressure Regulator

Description

The Computer Controlled Automated Pressure Regulator (Model APP-100APR) is designed to provide accurate control of gas pressures and compliment APP's line of automated valves and pressure control systems. This regulator is designed for laboratory, pilot plant, and process control applications. For a more complete description of this product please contact us.

Features

- Available in pressure ranges from 10-3,000 psi.
- Controlled by a 0-2 V, 0-5 C, 0-10 V, or a 4-20mA single from a computer or a digital input
- Controls system pressure automatically based on process conditions
- Controls gas pressure remotely without any operator assistance
- Compact, easy to retrofit
